Subject: Former Dairy Crest Site.

Dear sir/ madam,

I am very much in favour of the proposed development for the Dairy Crest site as put forward by the Atmos project. As we all know the project has been a groundbreaking success in its approach and interpretation of the planning legislation.

The Atmos proposals would provide a tremendous boost to the town and to this large, derelict site that has such a massive potential for helping the Totnes community as a whole. If it has not been undertaken already I would strongly suggest that a poll of some sort be undertaken within the town to confirm the public support for the Atmos proposals as compared to those provided by the site's new owners.

I very much hope that away can be found to develop the site as intended by the Atmos proposals.

Kind regards and many thanks,

Chris Wright.
