Subject: Atmos

Hi

As a local resident I am writing to express my support for the Atmos project being included in the Neighbourhood plan. This project is a pioneering example of the kind of community action so desperately needed in these times of climate and ecological emergency. This project shows how Totnes can lead the way in imagining and delivering a viable alternative to our carbon intensive housing systems. It demonstrates the power of our vibrant community in building resilience for the future.

Yours sincerely

Ruth Sutcliffe
