Subject: Atmos Project and the Neighbourhood Plan

I am writing to register my support for the Atmos Project to be included and ultimately implemented as part of the Neighbourhood Plan. As a resident that lives within 200yds of the Dairy Crest site I believe it is vitally important that this project is seen through to its conclusion, it has had the backing of so many in the town through the referendum on the site development. The elements included in the proposed Atmos project are farsighted, certainly viable and truly in the interest of the people of this town and they are not beholden to the power of private developers interests.

Yours faithfully
