Re Neighbourhood plan

I support the inclusion of the Atmos scheme in the neighbourhood plan

The unique multi use plan for the site offers many benefits for the town including low cost housing, renewable energy, a leading regional cultural venue and flood defence. The ownership model retains profits for the local economy.

The inclusion would support the efforts of TCDS to secure the site for this scheme through presenting barriers for any other developer to provide a viable alternative.

The council should explore every avenue to further support Atmos.

Kind regards

Mandy Burton
