Subject: Atmos for Totnes

I would like to simply add my support to Atmos. It has the potential to showcase the incredible character of Totnes: a true community which is so rare these days.

Supporting the arts and cultural activities makes Totnes special. Atmos would be a landmark representing Totnes, in pride of place as people arrive by train, road, boat.

Looking to the future and COP26 it is vital to move to community led innovation. Creating spaces to connect, collaborate, to support each other. To allow Totnes to shine a light on the way to live to beyond oil, consumerism, consumption and competition. Totnes can show the UK a better lifestyle, not the identical global brands and second homes that plague many areas.
