Subject: Atmos

Hi there,

Please would you include Atmos Totnes in the Neighbourhood Plan.

I was took part in the early consultation and thought it was the best community engagement processes I've seen. It seems to me that this is a nationally (and internationally) leading example of how good development should be done in a time where we are needing to transition to net zero carbon, while also strengthening community and supporting those with less money (i.e. supplying genuinely affordable homes)

I was completely shocked to hear that the site was sold to a private developer at the last minute after all this incredible vision and hard work and community involvement. It seems a complete tragedy, especially when it could have put Totnes on the map in terms of community development.

I hope you can include Atmos in the Neighbourhood Plan and do everything you can to help make Atmos happen and stop this incomprehensible decision to sell to another developer.

Please let me know if I can do anything to support you in doing this.

Best wishes,

Robin
