Subject: Proposed development, Dairy crest site.

I am a resident of Totnes who lives with our young family close to the old Dairy Crest site. I have taken a keen interest in the proposed policy for its redevelopment. I have read all the documents on the council website and would like to express my full support for the proposed intentions of this development. I feel it is an exciting opportunity to take control of this site to benefit the whole town and its unique community. My fear is if this proposal is not adopted Totnes will have an inferior and generic proposal that benefits the developer and takes money out of the town. This is an opportunity to put Totnes on the map as an example that could have a global influence as a more community focused way to approach development and it has our family's full support.

Thank you for listening.
