

Frogmore and Sherford Neighbourhood Plan Reg 16 Consultation

Email from Rob Peters to Peter Hadley dated 18.08.21

Hello Peter,

Just to alert you of my village plan observations.

RE-MAP No. 8: COMPOSITE PROPOSALS MAP SHERFORD

Regarding local open green spaces marked in green.

Clearly some mistakes have been made, starting from Homefield, their tarmac drive, concrete pad and concrete road leading to the wood are coloured green.

Then there is, Giles Wood, this wood was planted and is owned by me. The only access to the wood is over private land.

Therefore, I submit the area in green, on the Sherford map, is NOT a local open green space.

Best wishes,

Rob.

Email in reply Peter Hadley to Rob Peters dated 18.08.21

Thanks for your email Rob

To allay your concerns, Local Green Spaces are scheduled on Pages 30 and 31. Map No. 6: 'Sherford's Green Spaces' only cites St Martin's war memorial which is listed no. 3 in Policy FSNP 15. Such areas are numbered and shaded dark green. The various pale green areas are not included and not referred to in the policy. I think you will find no mistakes here.

Kind regards.

Peter

Peter Hadley

Confirmatory email from Rob Peters to Peter Hadley dated 19.08.21

Hello Peter,

Thanks for the reply, I'm now armed with an answer, should other villagers misinterpret the plan. One wonders about the significance of the light green coloured areas.

Best wishes,

Rob.

Final response email from Peter Hadley to Rob Peters dated 19.08.21

Thanks Rob

We are asked to use Ordnance Survey base maps for the Neighbourhood Plan. They shade woodland areas in pale green, water in blue etc. We have used stronger colours to define 'policy' areas. Hope this helps.

All best

Peter
