Subject: Comments on policy for former Dairy Crest site

To whom it may concern,

I'd like to register my support for the Atmos Project plan for the site, and the need for any future plans for the site to consider the impact of climate breakdown. Given the failure of COP26 to ensure meaningful commitments to limit climate breakdown, young people such as myself will live in an increasingly uninhabitable world. Community based plans such as the Atmos project will limit these impacts locally, and any future plans for the site should include the same provisions to protect the town from flooding, as well as energy coming from renewable sources.

Best wishes

Anna Lopez
