Subject: The Atmos Project

Dear Totnes Town Councillors,

I am writing to register my strong support for the Atmos Project that the people of this town were consulted on, in depth, and voted for as a result. What has happened is morally wrong and a real betrayal of the hard work and time that people have put into it. These people are genuinely trying to make Totnes more economically resilient as well as looking out for ecological protection, cultural heritage and local employment / well being.

It is up to every community to think long term and make decisions that will have positive long term effects for the whole community - we are in changing times and it's time to stand up for what is right over personal interests. If we don't we will get what we deserve.

Please support the Atmos Project to help us all create:

- Genuinely affordable houses held in perpetuity for the Totnes community.
- Restoration of a significant heritage asset - the Grade II listed Brunel Building - for the community and wider public.
- Mixed-use development to meet the needs of sustainable businesses and increase employment opportunities and training.
- A sustainable transport hub.
- Low carbon energy generation for the whole site.
- Critical flood defences for the town.
- Protection and enhancement of important ecological habitats

With best wishes,

Susie Nicholls
