Subject: Atmos/local plan

To Whom It may Concern,

I am writing regarding the Atmos project.

As well as all the common sense reasons for Atmos happening and the much needed real affordable housing, it also presents a unique opportunity for Totnes to have a truly forward thinking and exceptional project that will draw world wide attention.

I cannot think of a project that could benefit the people of Totnes more. Not just the people that will directly benefit from living and working in the community and the jobs and training created but the ripple effect of having such a positive model of community living in these times.

This project I believe will be considered historic and a community model will be created not just providing housing but thinking about how housing can also create community cohesion and well being and also living as we need to for the planet.

This must be part of the local plan. I cannot imagine any local council not supporting the community purchase on this extraordinary groundbreaking opportunity that will be a fantastic boost to Totnes and a model for other communities. What a wonderful project to be associated with.
