Subject: Proposed Policy C12

Dear Madam or Sir,

I fully support the use of the site for the Atmos project for Totnes. It is an exciting, innovative, communitybuilding, ecologically sound, creative and much needed use for the site in the town. I am one of those who has followed the project from the edges, rather than being directly involved, but have always felt really thrilled by the possibilities it offers for the town of Totnes and the area. I work in professional theatre, having toured nationally and internationally at the mid-scale with my company, which was resident at Theatre Royal Plymouth. So I'm very well aware of the rich amount of skills, experience and the many professional creatives who live locally and who could make the performance space at Atmos into something really special.

best wishes,

Hannah Mulder
