Subject: Atmos Project

Dear Council Administrator

I am writing this sensing the urgency & vital importance of the Atmos Project to be included in the Town Plan.

I have lived in Totnes since I went to school at Dartington in 1958, & apart from the Elmhirst's other great experiments, which transformed the town into a place of global recognition, I believe that the Atmos scheme has the potential to do the very same.

I am most impressed with the huge amount of time & dedicated professional work that has already gone into this, & in a true spirit of community. This must be realised, & you at the Council have the ability to make it come about.

It will bring urgently needed work to the town, as well as a template vision of what all future towns can be across the UK : a true flag bearing project we can all be proud of.

My best wishes

Fiona Green
