Subject: Neighbourhood plan

Thank you for sending me a copy of consultation documents concerning the former Dairy Crest site. I am sure that many of us would agree that the sooner this site is developed the better provided that it is done with sensitivity to the needs of the town.

Totnes is expanding very rapidly and it is impossible that the construction of so many new housing developments can continue without improving and expanding the necessary infrastructure for community care. Assuming that our minor injuries unit will reopen in the future, our greatest need is for another medical practice. A doctors surgery, dentist and perhaps a multi use clinic, (health visitors, ante-natal,) should be a priority. I am also concerned that our existing schools , both primary and secondary, will be unable to accommodate a greater influx of children as families settle into the enormous number of new homes being built.

This is the time to look to the long term future of the town while we still have some control over the development of our diminishing public spaces.

Best regards Sue Boal
